

300W Wind Generator Kit

Category: New & Renewable Energy · Model reference: MZM-5000

SPECIFICATIONS

DESCRIPTION:

- 6 rotational wings as mounted
- Inverse current protection
- Built-in charge controller and built-in battery
- Overcurrent/electric discharge protection
- 360° rotation by the direction of wind
- Configurable composite structure by adding optional modules in energy production such as solar cell and fuel cell
- Energy processing experiments

Experiments:

Standalone Use

- Principle of wind power generation (simulation)

With

- Wind generation characteristics by the load
- Wind generation characteristics by the wind speed
- Battery charge and inverse voltage protection
- Composite configuration with solar cell modules
- Interlocking experiment on Power Processing/Conversion Module Monitoring on AC to DC conversion

Accessories:

- Cable (Power, Serial, Circuit Connection): 1 set

User Manual: 1 ea.
