

Decade Resistor Box

Category: Test & Measurement · Model reference: MZM-9018

SPECIFICATIONS

DESCRIPTION

A precision resistance decade box designed for general laboratory work including platinum resistance thermometry. Compact and durable, housed in a robust case, making it ideal for use in either the laboratory or field. Excellent accuracy is achieved by using high stability metal film resistors. For connections the unit features safety terminals that are compatible as well as standard plugs, bare wires, and spade terminals.

B. SPECIFICATIONS

Features

1. High accuracy
2. Clear visual indication
3. High stability
4. Low temperature coefficient
5. Safety terminals
6. Suitable for industry or education.

Decade Range Max. Current Dimension(mm)

1. $0.01\Omega \times 10$ 700mA
2. $0.1\Omega \times 10$ 700mA
3. $1\Omega \times 10$ 700mA
4. $10\Omega \times 10$ 200mA
5. $100\Omega \times 10$ 70mA
6. $1000\Omega \times 10$ 20mA
7. $10000\Omega \times 10$ 7mA

(LxWxH) : approx. 285 X 140 X215

Weight : approx. 2.2kg
